

- Download and Extract **Assignment3_Intro.zip** (Python Notebook).
- Activate your conda environment: in Terminal **conda activate FMP**)
- Go to that folder where you have the notebook and run it: in Terminal **jupyter notebook**.
- Open **pitch_estimation.ipynb**
- Follow the instructions and run each cell .
- (Call me if you have any doubt). This is it for today!

This was the 1st part of the assignment (Intro). Try to play with this notebook during the week.
Next week, I'll launch the 2nd part of the assignment.
